checklist:
- "Docstrings accurately describe function purpose and parameters"
- "Style matches project convention (e.g., JSDoc /** ... */)"
- "Return values are documented"
- "Edge cases and error handling are mentioned"
- "No vague or misleading descriptions"
- "Code compiles/builds locally (npm run build)"
- "No syntax errors introduced by docstring formatting"
- "Linting passes (npm run lint)"
- "Unit tests pass (npm test)"
- "Vercel preview build succeeds"
- "Required environment variables are set in Vercel"
```

- "Build script in package.json is valid"
- "Framework config (next.config.js or vercel.json) is correct"
- "Automated review completed or manually validated"
- "Reviewer approval recorded"
- "Merge conflicts resolved"
