Pull Request Template 01

Description

Please provide a clear summary of the changes and the motivation behind them.

Checklist

Before submitting, ensure the following items are complete:

Docstring Review

- Docstrings accurately describe function purpose and parameters
- Style matches project convention (e.g., JSDoc /** ... */)
- Return values are documented
- Edge cases and error handling are mentioned
- No vague or misleading descriptions

Code Quality

- Code compiles/builds locally (npm run build)
- No syntax errors introduced by docstring formatting
- Linting passes (npm run lint)
- Unit tests pass (npm test)

Deployment Checks

- Vercel preview build succeeds
- Required environment variables are set in Vercel
- Build script in package.json is valid
- Framework config (next.config.js or vercel.json) is correct

Review Process

- Automated review (CodeRabbit) completed or manually validated
- Reviewer approval recorded
- Merge conflicts resolved

Screenshots / Logs (if applicable)

Attach relevant screenshots or error logs here.

Final Notes

Ensure documentation is updated if needed.

Confirm deployment stability after merge.
